Bangalore, India | +91-7259263223 | jayantchand2379@gmail.com | Portfolio | LinkedIn

SUMMARY

Software Developer with 1.5+ years of production experience across Full Stack development, DevOps, Data Engineering, and AI/ML. Builds and ships secure, scalable systems end-to-end — from PostgreSQL schema design and Django REST APIs to Docker-based CI/CD on AWS. Comfortable across the stack: Python, Rust, React, and deployed ML pipelines.

SKILLS

Languages: Python, Rust, JavaScript, Bash

Backend & APIs: Django, Django REST Framework, FastAPI, Flask, Node.js, RESTful APIs, WebSocket (WSS), NATS Messaging

Frontend: React, HTML, CSS, Tailwind CSS, Figma

Databases & Async: PostgreSQL, MongoDB, Redis, SQLite, Django ORM, DB Indexing & Query Optimization, Celery

Cloud & DevOps: AWS (EC2, S3), Docker, Docker Compose, NGINX, Gunicorn, GitHub Actions, CI/CD Pipelines, Linux

AI / ML & Data: TensorFlow, Scikit-learn, CNN, LSTM, NLP, LangChain, LLMs, Agentic AI, MCP, Pandas, NumPy

Security & Testing: JWT, OAuth2, mTLS, HTTPS, pytest, Postman, Git

RESEARCH & PUBLICATIONS

IEEE InC4 2025 — “AI/ML Deepfake Detection using CNN + LSTM”; accepted & presented (~15% acceptance rate; indexed on IEEE Xplore); Paper ID: 1164. [\[View Paper\]](#)

Journal — *Evolution of NLP: A Review*, Journal of Knowledge in Data Science and Information Management, Apr 2024. [\[View Paper\]](#)

EXPERIENCE

AI & Machine Learning Engineer Intern

Sep 2024 – Feb 2025

Rooman Technologies, Bangalore, India

- Engineered end-to-end Python ML pipelines for customer segmentation using deep clustering and autoencoders, improving targeting accuracy by ~25% across production data.
- Performed large-scale feature engineering with Pandas and NumPy; deployed trained models as Dockerized Python REST services used by the analytics team in production.

Junior Software Engineer — Full Stack / Backend / DevOps

Feb 2025 – Present

Aapteknio US LLP, Bangalore, India

- Architected Python RESTful backend services with Django DRF and PostgreSQL supporting secure enterprise data exchange; implemented JWT and mTLS authentication and hardened API security across all enterprise deployments.
- Built a high-performance Rust + Python agent service with DB indexing strategies, reducing average API response time by ~40%; managed NGINX reverse proxy and Gunicorn configuration for production workloads.
- Automated CI/CD pipelines via GitHub Actions and Docker across multiple services, cutting release cycle time by ~50% and enabling consistent zero-downtime deployments to AWS EC2; integrated async inter-service messaging via NATS within a microservices architecture.

PROJECTS

AI Agent Job Search — Autonomous Career Monitoring System

Apr 2026 – Present | GitHub

- Built an agentic job-search system using Hermes Agent + TinyFish MCP tools; crawls 25+ company career pages daily, ranks postings via a weighted scoring model (stack overlap, seniority, location), and auto-generates tailored cover letters and resume-matched bullet points on command.
- Integrated OpenRouter LLM backend (Llama 3.3 70B / DeepSeek) with a Telegram bot gateway for ranked role alerts; deployed 24/7 on Oracle Cloud Free Tier (Ubuntu) with persistent cross-session memory.

InvoiceHub — SaaS Billing & Subscription Platform

Aug – Oct 2025 | GitHub

- Built a production-grade full-stack SaaS app with Django REST Framework and React; designed PostgreSQL schemas with indexing, Redis caching, and Celery async task queues for subscription billing workflows.
- Provisioned multi-container deployment on AWS EC2 with NGINX + Gunicorn; implemented GitHub Actions CI/CD pipeline for automated build, test, and deploy on push to main.

AI-Based Deepfake Detection — CNN + LSTM Video Analysis

Dec 2024 – Feb 2025 | GitHub

- Designed and trained a CNN + LSTM pipeline achieving ~90% deepfake detection accuracy; implemented frame-level and temporal feature extraction to reduce false positives on benchmark video datasets.
- Deployed as a Dockerized REST inference API (Django + Flask + NGINX), handling ~150+ requests/day at sub-300ms response time; research published at IEEE InC4 2025.

EDUCATION

Bachelor of Engineering, Information Science

Jul 2021 – Jun 2025

Visvesvaraya Technological University, Karnataka, India

CGPA: 8.3 / 10

ACHIEVEMENTS & CERTIFICATIONS

Certifications: Mastering Python (Infosys) | Cloud Computing (IBM) | Deep Learning (NVIDIA) | AIML Engineer (NSDC)

British Airways & Quantum Data Analytics virtual simulations (Forage) | Smart India Hackathon 2024 | IEEE Hackathon 2023 | Event Manager — *Techsum* (ISTE), coordinated 100+ volunteers
